

# All seminar series

## AII TV

Please join us on November 1st, 16.00-17.00 hrs at the 'Costerzaal', location AMC

*Hybrid meeting with live streaming, followed by drinks*

**Young investigator in the spotlight - short talk:**

**Helga Simon-Molas**

**Glutamine, an important fuel in chronic lymphocytic leukemia**

**Keynote speaker:**

**Ping Chih Ho**

**Targeting mitochondrial dynamics for tailoring T cell anti-tumor immunity**

Ping-Chih Ho is a cancer immunologist with particular research interest in immunometabolism, the tumor microenvironment and viral infection. His ultimate goal is to exploit our findings to better harness our immune system in fight against infection and malignancy. In addition, he also envisions to reprogram the tumor microenvironment, reverse immunosuppression and broaden and boost the efficacy of cancer immunotherapy.

His research is also acknowledged by several international awards, including the CRI Lloyd J. Old STAR Award, EMBO Young Investigator award, MRA-SITC Young Investigator award, MRA Established Investigator Award, CRI CLIP-investigator award, and the Swiss Bridge Award.

Ping Chih Ho

Host:

**Arnon Kater**
