PARALLEL THEME SESSIONS

PROGRAM

- 08:45 – 09:20** **Registration**
- 09:30 – 10:00** **The meaning of impact**
dr. Frank Kupper
- 10:00 – 10:10** **Welcome**
dr. Dionne Kringos, vice director APH
- 10:15 – 10:45** **Nothing about us without us: Co-creation in autism research**
prof. dr. Sander Begeer & Vincent van Loenen
- 10:45 – 11:10** **Coffee & tea break**
- 11:15 – 11:45** **Bridging the gap: Using health communication strategies for societal impact**
prof. dr. Julia van Weert
- 11:50 – 12:20** **Pitches: Two examples of APH's best impact practices**
dr. Bibian van der Voorn, Care for Obesity
dr. Vincent van Vugt, Vertigo
- 11:20 – 12:30** **Farewell speech Martine de Bruijne**

12:30 – 13:50

Walking lunch break

> Poster presentations (12:50-13:50)

> Workshop stakeholder analysis by Diane Schöller and Eline van Dulmen (12:50-13:50)

14:00 – 15:30

Parallel theme sessions

organized by APH research programs

15:30 – 15:50

Grab a healthy snack break

15:50 – 16:20

Plenary closing

> Poster Award ceremony & Impact Booster Grant Award

> Award ceremony ZonMw Parel by prof. dr. Arfan Ikram

16:20 – 16:30

Entertaining closing: Creating impact together

16:30 – 18:00

Drinks & appetizers

KEYNOTE SPEAKERS

FRANK KUPPER

THE MEANING OF IMPACT

Biography

Frank Kupper is a researcher, facilitator and theatre maker at the boundary between science and society. With his company Mens in de Maak he combines improvisational and participatory theatre with playful reflection to create conversations about science that matter. He also provides advice on public engagement, dialogue and creative deliberation. As an Associate Professor at Vrije Universiteit Amsterdam, he leads the Science in Dialogue network that aims to bring researchers into dialogue with society. His mission is to create more openness and dialogue in the world of science.

SANDER BEGEER & VINCENT VAN LOENEN

NOTHING ABOUT US WITHOUT US: CO-CREATION IN AUTISM RESEARCH

Biography

Sander Begeer is Professor of Diversity and Autism at the Vrije Universiteit Amsterdam. His research is focused on understanding differences between autistic and non-autistic individuals (positive and negative), to increase our understanding of both conditions. He (co)founded and directs the Netherlands Autism Register (NAR), a large longitudinal cohort of autistic individuals. Their aim is to increase mutual understanding and improve support where needed. Vincent van Loenen is ambassador of the Netherlands Autism Register.

JULIA VAN WEERT

BRIDGING THE GAP: USING HEALTH COMMUNICATION STRATEGIES FOR SOCIETAL IMPACT

Biography

Julia van Weert is Professor of Health Communication and Head of the Department of Communication Science at the University of Amsterdam. She is founding director of the Amsterdam Center for Health Communication (ACHC), co-lead health of the national Gravitation program AlgoSoc (Public Values in the Algorithmic Society), co-lead of the ELSA Lab AI for Health Equity and board member of the UvA's Research Priority Urban Mental Health. Her research focuses on effective health communication, in particular for underprivileged and/or less well-represented people. She has a special interest in digital (AI-based) interventions like eHealth and mHealth and their impact on health outcomes and well-being.

APH'S BEST IMPACT PRACTICES

BIBIAN VAN DER VOORN

CARE FOR OBESITY; DEMAND-DRIVEN, USER-FRIENDLY, APPROPRIATE AND AVAILABLE INTEGRATED CARE FOR CHILDREN WITH OVERWEIGHT AND OBESITY

Biography

Dr. Bibian van der Voorn is a leader in pediatric obesity, known for her clinical translational research and interdisciplinary collaborations. After earning her PhD she became a medical doctor and postdoctoral researcher at the European Collaborating Centre for Obesity Management (EASO). In 2021, she joined the project Care for Obesity at the department of Health Sciences, Vrije Universiteit Amsterdam to deepen her expertise in policymaking and integrated care. From 2022, she leads the long-running Care for Obesity project, which bridges research, policy, and practice by promoting the use of both practice-based evidence and evidence-based practice. By 2023, she was appointed Assistant Professor in childhood obesity.

VINCENT VAN VUGT

REACHING SOCIETAL IMPACT: THE JOURNEY TO BRING DIGITAL CARE FOR DIZZINESS TO GENERAL PRACTICE

Biography

Dr. Vincent van Vugt is a general practitioner, Assistant Professor and epidemiologist. He studied dizziness and eHealth in general practice, resulting in a dissertation which was awarded the distinction cum laude in December 2020. He has since expanded his scope to digital healthcare in general practice for all chronic diseases, and is currently working on a VENI project to investigate the best way to design blended care interventions. His main research focus is on keeping primary care sustainable. By developing, testing and implementing novel interventions for chronic conditions such as dizziness, he aims to deliver easily accessible solutions for patients and general practitioners.

POSTER PRESENTATIONS

GROUND FLOOR

Nominated for Poster Award 2024

A	Almar Kok	A&LL	Exploring the temporal ordering of age-related changes in physical, cognitive, emotional, and social functioning with dynamic time warping analysis
B	Andrea Thoosen	QoC	Nationwide guideline implementation: a qualitative study of barriers and facilitators from the perspective of guideline organizations
C	Arpana Amarnath	MH	Effectiveness of a guided internet-based self-help intervention reducing procrastination among university students – a randomized controlled trial
D	Bart Cillekens	SPH	Physically demanding work versus leisure-time physical activity
E	Fleur Heuvelman	HBCD	The implementation of physical activity environment policies in the Netherlands: a study applying the Physical Activity Environment Policy Index (PA-EPI)
F	George Aalbers	DH	Smartphone-tracked behavioral markers of depression and anxiety
G	Hanneke Lettinga	SPH	Facilitators and barriers for a stepped-care approach to promote return to work of employees with distress. A multi-perspective qualitative study
H	Jessie de Ruijter	QoC	The influence of speech material and intelligibility on the pupil dilation response in ci users

POSTER PRESENTATIONS

I	Joshua van Apeldoorn	PM	Adding ethnicity to cardiovascular risk prediction: external validation and model updating of SCORE2 using data from the HELIUS population cohort
J	Lingyao Tong	GH	Understanding and addressing mental health gap by using alternative interventions for adult depression: synthesized evidence from meta-analyses
K	Loes Lindiwe Kreeftenberg	PM	Engagement of patients and the public in personalised prevention in Europe using genomic information: a scoping review
L	Marieke Hoevenaar-Blom	HBCD	Mediation of modifiable risk factors in two multidomain dementia prevention trials
M	Melanie de Wit	MH	A pilot exploration of Dutch stakeholder perspectives on genomic research on autism
N	Niels Bal	GH	Syndemic processes between NCDs and HIV among adults aged 40 years and above within the Kingdom of Eswatini
O	Yuwei Qi	A&LL	Defining a longitudinal composite score for intrinsic capacity in the Longitudinal Aging Study Amsterdam
1	Adrià Túnez	HBCD	Unraveling the genetic architecture of smoking: pathways of genetic risk through addiction and socioeconomics
2	Aline Westendorp	A&LL	BIRD-NL consortium: enhancing knowledge on modifiable risk factors for dementia to improve dementia prevention
3	Anne Landvreugd	MH	Between the biological and social clock: Exploring the association between social jetlag and wellbeing
4	Anne van Graafeiland	QoC	Defining the supportive teaching climate: the needs of clinical supervisors in residency training
5	Anne van Woezik	MH	Evaluation of a web-based guided self-help intervention to reduce perfectionism in college students: preliminary results from a feasibility study

POSTER PRESENTATIONS

6	Anouk Groenewegen	PM	Evaluation of PROM implementation in clinical practice: a qualitative study with clinicians
7	Bryn Hummel	PM	"Invisible Illness": A co-created theaterplay on recognizing cardiac symptoms and seeking care
8	Charlotte Albers	A&LL	Trends in prevalence of psychotropic drug prescriptions among Dutch nursing home residents admitted to dementia special care units between 2016 and 2023
9	Danny Bruins	PM	Dutch citizens' views and perspectives regarding health-related direct-to-consumer genetic testing (DTC-GT)
10	Donna Beerda	SPH	The SME tool supporting employers of small- and medium-sized enterprises during the return to work of employees on long-term sick leave: study protocol for a randomized controlled trial and for a process evaluation
11	Dorinde Korteling	MH	Development of a core PRO(M) set in pediatric physiotherapy
12	Elise Beket	MH	Competing responsibilities: adolescents about their mental health
13	Esther de Groot	A&LL	Changed relationships: experiences of people with alzheimer's disease, huntington's disease, korsakoff's syndrome and their informal caregiver
14	Federica Nava	MH	Posttraumatic stress disorder in the Netherlands: prevalence, help-seeking and barriers
15	Fenna van Ommen	SPH	The PLACES study: protocol of a randomized controlled trial on the (cost-)effectiveness of a supported employment intervention aimed at enhancing work participation of unemployed and work-disabled cancer survivors
16	Fiorella Huijgens	QoC	How clinicians perceive and manage cancer patients' burden regarding involvement in treatment decision-making
17	Frederique van den Heuvel	HBCD	Pouring rights contracts between student associations and beer breweries in the Netherlands: a qualitative investigation of stakeholders' views
18	Gary Yeung	A&LL	Factors: observational study with electronic health record data from 2017-2022

POSTER PRESENTATIONS

19	Georgios Soutlanopoulos	MH	Adapting to fatherhood: a qualitative study into resilience resources
20	Hieke Barends	MH	Lost in fragmentation - care coordination when somatic symptoms persist: a qualitative study of patients' experiences
21	Hieke Barends	MH	Exploring maladaptive cognitions and behaviors as perpetuating factors in patients with persistent somatic symptoms: a longitudinal study
22	Isaac Kisiangani	GH	Recovery and long-term health outcomes of SARS-CoV-2 infection in a prospective cohort in an urban setting, Kenya
23	Jakob Laurens Schroevers	A&LL	Antihypertensive medication classes and risk of incident dementia in primary care patients: a longitudinal cohort study in the Netherlands
24	Jantine Maarleveld	SPH	A computer-assisted occupational reintegration protocol for occupational health professionals to guide Dutch workers on sick leave due to musculoskeletal disorders back to work: A study protocol of a non-randomized controlled trial
25	Jeanet Karchoud	MH	Predicting long-term PTSD in adults following traumatic injury: a 12-15 year longitudinal study
26	Jesse Vastenhouw	HBCD	Power play: comparing the influence of commercial actors on health and climate policy development
27	Joel Zwiép	MH	Depression with immuno-metabolic dysregulation: testing pragmatic criteria to stratify patients
28	Joost Gülpen	MH	Psychological interventions for preventing relapse in individuals with partial remission of depression: a systematic review and individual participant data meta-analysis

29	Judith Mollet	SPH	The MiLES intervention targeted at employers, aimed at enhancing successful return to work of employees with cancer: initial insights into recruitment of employee-employer dyads
30	Judith Visser	HBCD	The role of gender in smoking cessation support among people with a low socioeconomic position: perspective of healthcare professionals
31	Karolin Schwellnus	MH	Temporal dynamics of perceived self-reliance and psychiatric symptoms in older adults: applying dynamic time warping to longitudinal cohort data
32	Katrina Messiha	GH	Enriching the existing knowledge about co-creation: identifying dimensions of co-creation using explicit theory in various research fields
33	Kirsten Muller	MH	Parental depressive and posttraumatic stress symptoms after preterm birth: the HIPPO 2 year follow-up study
34	Liping Wang	A&LL	Beat-to-beat blood pressure measurements and orthostatic hypotension related falls in older adults
35	Mana Nasori	MH	The journey of parents caring for people with rare genetic intellectual disability and challenging behaviour
36	Mara de Visser	SPH	Employment prospects among individuals with work disabilities before, during and after the COVID-19 pandemic: a longitudinal cohort study
37	Mariska de Wit	SPH	Let's talk about work: evaluation of an education program for general practitioners in training on discussing work with cancer patients
38	Maxime de Jong	MH	Female-specific pharmacotherapy in ADHD: Premenstrual Adjustment of Psychostimulant Dosage
39	Mayte Sanchez van Kammen	HBCD	COHoRT - a national data registry for lifestyle front offices
40	Melisa Saygin	MH	Controlling respiratory sinus arrhythmia confounding in daily life research: a comparison between approaches to control for respiration and how they attenuate confounding by speech

POSTER PRESENTATIONS

41	Michaela Kaneva	MH	"Beyond the Ivory Tower": Moving towards "RE-CONNECTED" societies through community-based participatory research & co-creation
42	Mika Grijzenhout	HBCD	Why and how are Dutch municipalities grappling with addressing the food environment? A qualitative investigation of policymakers' perspectives
43	Miriam Schutte	QoC	Between instinct and deliberation: a qualitative study of physicians' decision making in infection prevention practices
44	Mirthe Klein Haneveld	PM	We are the engine: a focus group study on clinical practice guideline development with European patient advocates for rare congenital malformations and/or intellectual disability
45	Mirthe Klein Haneveld	PM	Priority-setting criteria for clinical practice guideline development in the context of rare and complex conditions: a Delphi study within the European Reference Network (ERN) ITHACA
46	Pablo Stegerhoek	SPH	More than just workload-personnel's perspective on workload at the Royal Netherlands Marechaussee: a qualitative study
47	Renée Wink	HBCD	B-Challenged: a multi-actor, inter-sectorial, democratic approach to improve children's active outdoor play and related dietary behaviours
48	Saskia Oosterbaan- Lodder	QoC	What keeps the flame burning? A qualitative study on tutor motivation to guide students in an Interprofessional Training Unit
49	Sehida Begovic	SPH	The impact of poverty on oral health and dental visits: insights from victims of the child benefits scandal and their care providers
50	Shahriyar Shahbazi Khamas	PM	Complementary predictors: salivary microbiome, serum inflammatory mediators, and past attacks history in asthma attacks prediction
51	Shalina Saddal	SPH	Generic and disease specific risk factors for work difficulties and working hours after 1 year in recently diagnosed people with multiple sclerosis
52	Shanna van Trigt	MH	The role of sleep in borderline personality disorder: from causative factor to treatment target

POSTER PRESENTATIONS

53	Sharon Wesselius	QoC	'What they need' Women's perception of the care and needs for support during pregnancy and postpartum period for women with social-, psychological-, and/ or lifestyle-related risk factors in Amsterdam South-East, the Netherlands, a qualitative study
54	Suzanne Orhan Pees	SPH	A mixed methods process evaluation of a peer coaching intervention program to improve the implementation of preventive tasks by occupational physicians
55	Taryn G. Vosters	HBCD	Predictive value of current chronic kidney disease screening criteria in women and men across ethnic groups. The HELIUS Study.
56	Tsvetan Yordanov	Meth	Optimizing early heart failure detection: a novel phenotyping approach in Dutch primary care
57	Valentina Navarro Ovando	MH	Exploring sex differences in performance and motor activity of adults with ADHD: insights from a continuous performance test
58	Vanessa Feenstra-Kikken	QoC	Occupational performance in adult cochlear implant users. A comparison with individuals with hearing impairment without cochlear implants and with individuals with normal hearing.
59	Wieke Beumer	MH	Long-term effects of unintended pregnancies carried to term on mothers and children
60	Yuwei Qi	A&LL	Trajectories of intrinsic capacity: the Longitudinal Aging Study Amsterdam
61	Yvonne van Zaanen	SPH	Predictive validity of the work, osteoarthritis, or joint replacement questionnaire for return to work after total knee arthroplasty: a 12-month multicenter prospective cohort study
62	Marije Hagendijk	SPH	A multidisciplinary patient-centred minimal set of work-related outcomes: Development and user test
63	Fleur ter Ellen	HBCD	Understanding the dynamics driving obesity in deprived urban neighbourhoods: an expert-based systems map

PARALLEL THEME SESSIONS

ETHICS WORK OF PARTICIPATION IN RESEARCH AND PARTICIPATORY RESEARCH

Organized by Personalized Medicine, Methodology and Health Behaviors & Chronic Diseases

This session delves into the theory and practice of 'ethics work in everyday ethical issues in participation', an important topic in our academic and societal landscape. We start with an introduction of 'ethics work in participation'. Following this, we will discuss three practical examples of ethical issues and ethics work from the contexts of youth co-creation of socially- and physically- healthy urban public spaces, co-creation in ethnically-diverse communities and participatory research with trans and gender diverse clients. We will finish the session with dialogue about 'ethics work' in subgroups, and a plenary exchange of tips and tricks.

CITIZEN SCIENCE & HEALTH: COLLABORATION OF RESEARCH AND SOCIETAL INITIATIVES PROMOTING MENTAL HEALTH

Organized by Mental Health

In a plenary introduction we learn more about citizen science. What is citizen science? How can it enhance your research in the (mental) health domain? And what is in there for patients and citizens? The second part of the session focuses on an interactive discussion on citizen science in relation to health, research, researchers, data and ethics. What could citizen science add to your research and mean for society? Finally, Gaston will present projects showing how citizens and science can work together. Learn from practical examples, discuss with your fellow researchers and dive into the field of citizen science!

CREATING IMPACT: CO-CREATION, SOCIETAL IMPACT, AND POLICY CHANGE

Organized by Aging & Later Life and Global Health

We present two cases: (i) From outside to inside: Staff shortages challenge care systems, not only in the Netherlands but also abroad. Researchers from Global Health are involved in "family nursing in Bangladesh hospitals". Family members are taught to perform care activities usually done by trained staff. How to measure impact of such co-created interventions?

(ii) From inside to outside: Started as local research project over 30 years ago, meetings centers for persons with dementia and their informal caregivers have disseminated nationally and internationally. How did such a complex intervention become successful? What are the lessons learned? Founding mothers share their experiences.

BOOST YOUR RESEARCH IMPACT: HARNESSING SOCIAL MEDIA EFFECTIVELY

Organized by Quality of Care

Join us for an interactive workshop designed to empower APH researchers with the skills to effectively share their research through social media. Erik Michels, a PhD candidate in Internal Medicine, will kick off the session by discussing his experience with the Amsterdam UMC 'Facts and Fables' project, which uses TikTok videos to debunk medical misinformation. He will share valuable tips and tricks for effective digital communication for research purposes. In the second part of the session we will guide researchers in creating their own research-oriented TikTok videos using provided props. This practical session will help attendees make their first video, enhancing their communication skills and learning to make a real impact with their research through social media. Dare to have a fun time while boosting your research dissemination capabilities!

RESPONSIBLE AI IN PUBLIC HEALTH

Organized by Digital Health and Societal Participation & Health

Join us during an engaging parallel session on responsible AI, hosted by APH Digital Health and APH Societal Participation & Health. This interactive session will explore how AI can ethically and effectively improve public health outcomes. Our speakers will present about trustworthy AI, legal issues associated with AI and on application of AI in occupational health and we will end with a discussion on responsible AI. Engage with fellow APH researchers to ensure AI innovations benefit society responsibly.

APH Impact Booster Grants

6 APH IMPACT BOOSTER GRANTS

With a value of maximum €5.000

APH is offering 6 APH Impact Booster Grants with a value of maximum € 5.000 to APH researchers. The booster aims to strengthen the impact of research conducted within APH. To compete for this booster grant, you have to submit an eligible booster plan and attend the Annual Meeting. At the end of the meeting, 6 winners will be selected during the plenary closing ceremony based on random selection.

On the next pages you can see our Impact Booster Grant nominees!

Impact Booster Grants nominees

1. Anne de la Croix - Parent or educator? A study into the development of parent educators working in health professions education
2. Anne Marie Vaalburg - Learning and working book for nurses in geriatric rehabilitation
3. Anouk Groenewegen - Improvement of PROM education for patients: development of an accessible video
4. Athanasios Angelakis - Enhancing public health equity through explainable deep neural networks: Addressing bias and mental health factors in the HELIUS Cohort using advanced AI via co-creation with healthcare professionals and other stakeholders
5. Bedra Horreh - Dissemination of the results of a diabetes group program at individual and group level
6. Bodine Gonggrijp - Negative life events and health research consortium kickoff event
7. Carlien Straat - Return to work and daily life activities after knee arthroplasty symposium
8. Caroline Broeder - Developing guidelines for stress research in patients with mental disorders: a Delphi study involving lived experience experts
9. Charlotte Andriessen - Better type 2 diabetes treatment for everyone? Looking beyond the surface through co-creation with healthcare professionals
10. Danique Heemskerk - Symposium: The power of sleep for Generation Zzz
11. David Neal - Prompt engineering guidance for non-stigmatizing use of generative AI
12. Donna Beerda - Impact in action: Transforming course insights into an implementation plan
13. Donny Buisman - From scoping review to anticipatory action research: A visualization
14. Donny Kreuger - Maximizing awareness and adoption of a working method based on the International Classification of Functioning Disability to enhance interprofessional collaboration in the return-to-work process
15. Eline Engelen - Bridging research and practice: A stakeholder process evaluation of a transitional multidisciplinary pharmacotherapeutic care intervention to improve medication safety for older patients
16. Elke Bos - Escape Game for clinicians and researchers titled "The Bias Breakout"
17. Ellen Elsman - A knowledge translation plan for a new reporting guideline (PROM-GRIP)
18. Elmi Zwaan - Designing impactful interprofessional education for occupational health professionals
19. Hannah de Klerk - Breaking the silence about workplace sexual harassment in midwifery through a card game
20. Hieke Barends - Visual storytelling to disseminate research findings
21. Ilse Visser - Enhancing clinical impact in nasogastric tube feeding among young people with eating disorders: A knowledge exchange visit to NHS England
22. Jamie van Someren - Co-creation of Happiest Baby Method trainings with youth healthcare professionals
23. Jeanet Karchoud - Facilitating workshops "AI in healthcare" at Danish Veteran Center
24. Jeanine Rutten - Educational material on antibiotic resistance for frail older adults
25. Joost Gülpen - Co-creation for addressing cognitive complaints in depression: A participatory research approach
26. Joost van den Berg - From measurement to transformation of performance contexts: Dissemination of the value and usage of measurement tools
27. Judith Visser - Make potential a reality: Encouraging social workers to help smokers successfully quit through tools and guidelines
28. Juliet Hondtong - Including adolescents and adults with severe (speech) motor impairments in PROM research
29. Kaya Noll - WeCare: Researching and piloting interventions for a family-friendly work culture and optimal work-life balance in Amsterdam UMC
30. Kimmy Raven - Computational resources for impactful multidisciplinary research on CDSS alert interaction data
31. Kirsten Muller - Focus on parents of preterm born infants: Amplifying their voice in mental health assessment to improve care and inform research agendas
32. Liesbeth van den Berg - A digital health tool sandbox: A playground for research and education

Impact Booster Grants nominees

33. Lotte Rijken - Aneurysms patient day
34. Luc Hagenaars - Leaning back to push back: Unpacking the economic drivers of health-harming industries (development of a podcast)
35. Malindi van der Mheen - Impacting lifestyle behaviors in adolescents with mental health problems by developing a co-creative intervention
36. Mana Nasori - Co-creation to improve interprofessional collaboration with stakeholders from the healthcare and social domain
37. Marije Hagendijk - Concluding my PhD with impact: Mini symposium on my thesis defence day
38. Marloes Derksen - Guiding impact: Inclusive design principles for digital health literacy
39. Meagan Doppegieter - Prescribed rest: Audiotherapy support for skin conditions
40. Melanie de Wit - Exploring autistic adults' perspectives on genetics research: A co-creative approach to address ethical concerns
41. Minke Geerlings-Holleboom - Transforming care hackathon: Digital solutions to tackle nurse shortages and workload
42. Monique Alblas - Study on protecting youth from unhealthy food marketing on social media to disseminate to Ministry of Health, Welfare & Sport
43. Nicole Goedhart - Digital inequality: A hidden form of social inequality jeopardizing health - making a self-guided workshop
44. Niels Bal - Focusing the lens: strengthening collaboration in syndemic research with institutes to improve impact
45. Nina Zipfel - Value@WORK impact webinar: Translating research results into action
46. Paulien Tensen - Co-creation of an electronic personal health record with people in asylum procedure
47. Rashudy Mahomedradja - Implementing interprofessional education: Identifying facilitators, addressing barriers, and developing a toolbox for success
48. Renate Simmelink - Informative video and infographic for clients about midwife-led continuity of care for all women
49. Renée Wink - A sustainable network of adult stakeholders in B-Challenged, to improve active outdoor play and related dietary behaviours in children
50. Sagar Nagaraj Simha - Creating a usable open-source software tool for ICU decision-support
51. Sehida Begovic - Boosting oral healthcare knowledge in vulnerable urban communities through community-based workshops
52. Selina Limmen - Enhancing the KLIK PROM portal through an educational video to stimulate patient empowerment in pediatric physiotherapy
53. Shalina Saddal - Talking to people with multiple sclerosis: Experiences before diagnosis
54. Shanna van Trigt - Boosting implementation of online insomnia treatment for patients with borderline personality disorder by organizing events
55. Sophia E. Kramer - Ear and hearing science event
56. Tanja de Rijke - From plan to practice: Challenging the PhD research-practice gap via co-designing dissemination and sustainable implementation strategies
57. Taryn G. Vosters - Low salt cooking classes with high kidney disease risk populations
58. Tessa van Gastel - Supporting and empowering women with bleeding disorders through an accessible animation
59. Thomas Sollie - A citizen advisory panel for co-creating research with the autism community
60. Tom Steenbergen - SIMPATHIC: A core PROM set selected with patients and healthcare providers for rare neurological disorders.
61. Wieke Beumer - Each unintended pregnancy is different, as every person is different: A research based comic
62. Yasaman Vali - Development of a web-based calculator for clinicians for personalized NAFLD progression prediction
63. Yvonne Noteboom - Making a learning tool for implementing integrated VR interventions
64. Yvonne van Zaanen - Spreading thesis results to practitioners via infographics
