Methodology Tutorials
Tutorial series: Open Science and FAIR Data
by Ronald Cornet and Mariska Leeflang

Session 1: April 20th, 2023, 15:00 @ AMC

In three sessions we will discuss the use of freely available datasets, the FAIR-ization of your own data and peer-reviewing each other's data. We will combine informative lectures with practical sessions and examples of best practices. The tutorials are preferably attended all three, but each can be attended as a single session. In sessions 2 and 3 we ask you to bring your own data, but these may also be fake data, older data or simulated data.

FAIR SESSION 1: FIND YOUR DATASET
THURSDAY APRIL 20th, 2023 15:00-17:00

We will start with a short introduction of the APH research programs Methodology and Digital Health and an introduction to Open Science, Research Integrity and the role of FAIR data.
We will continue on data reuse. Fantastic feats and where to find them.
And we will share a success story of a project where open data was used.

Second half of the session will focus on: Finding data – looking for free and open (meta)data on the web. Where to search, what information do you need? How does it work, and what can you use the open (meta)data for? How useful are these?

Register here!

We hope to see you April 20th at location AMC!

The next sessions in this series are May 11th and June 27th, 15:00-17:00, exact location TBA.

APH is a collaboration between: Amsterdam UMC   VU Vrije Universiteit Amsterdam   University of Amsterdam
